

REMARKS

As amended, claim 29 overcomes the objection set forth in the Board's decision. Namely, the objection that a mere graphical user interface cannot be patentable is overcome by adding structural limitations to the claim. Moreover, additional limitations have been added to further establish the patentability thereof.

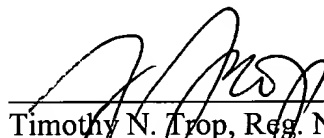

In view of these remarks, that claim and the new claims are patentably distinguished over the cited art. Nothing in the material cited in the Board's decision teaches the persistently displaying limitations.

Therefore the application should now be in condition for allowance.

Respectfully submitted,

Date:

5/4/05
